

UNIT 9 : SAVING THE PLANET

The planet = The Earth = The World / The Environment / The Nature

Save = Protect

Environmental Problems

- Pollution

Air Pollution

Water Pollution

Land / Soil Pollution

Noise Pollution

Light Pollution

• Global Warming

What is Global Warming?

- Global Warming is the increase of heat  in the Earth's atmosphere.

litter

trash

waste

rubbish

garbage

Waste Materials:

plastic bags

cartons

jars

carrier bags

pots

packaging paper

glasses

newspapers

cans

scissor

electronical devices

electric bulbs

batteries

plastic containers

tins

banana skins

eaten apple

glass bottles

plastic bottles

spray bottles

Types of Waste Materials

- ❖ Organic Waste
- ❖ Plastic Waste
- ❖ Glass Waste
- ❖ Paper Waste
- ❖ Metal Waste
- ❖ E- Waste
- ❖ Nuclear Waste

“ TO PROTECT THE ENVIRONMENT ”

“ TO SAVE OUR WORLD ”

“ TO MAKE OUR WORLD A BETTER PLACE TO LIVE IN”

- ❖ Have “3Rs Rules”

REDUCE

REUSE

RECYCLE

❖ Reduce

- Reduce pollution (reduce air pollution, water pollution etc.)
- Reduce the amount of carbon dioxide in the air
- Reduce the amount of rubbish
- Reduce the use of electricity and water

❖ Reuse

(use the same things again and again)

- Reuse the items
- Reuse the waste materials

❖ Recycle

(make new things from old things)

- Recycle waste materials
- Recycle paper, glass, metals and batteries

- recycling helps protect the environment
- recycling saves energy and money

- recycling bins are very important and necessary

❖ Don't buy unnecessary things

❖ Save the planet = Protect the planet

Save the Earth = Protect the Earth

Save the world = Protect the world

Save the environment = Protect the environment

Save the nature = Protect the nature

Save the animals = Protect the animals

❖ Don't hunt the animals

❖ Don't harm the animals and nature

❖ Don't destroy the planet

❖ Save water

- Use less water
- Take short showers to use less water

- Turn off the taps

when you don't you use them

❖ Don't waste water

- Don't leave the taps on when you brush your teeth

- Don't leave the water running when you don't need it

❖ Save Energy

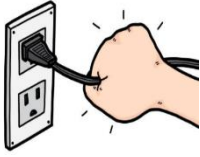

- Use less electricity

- Plug

electronical devices just before you use them

- Unplug  electrical devices when you don't use them
- Use electrical devices less

- Turn off the lights  when you leave the room

- Use energy-saving bulbs 

- Use eco-friendly light bulbs 

❖ Don't waste energy 

- Don't leave the electrical devices on when you don't use them
- Don't leave the lights on when you leave the room

❖ Stop wasting energy 

❖ Stop environmental problems (stop pollution, stop global warming etc.)

- Use public transportation 

- Get on busses instead of cars

- Don't drive private cars 

- Ride / cycle / bike to school or to work

- Walk for short distances / Walk to nearby places

- Use filters

- Use solar energy

- Use wind energy

- Plant trees

- Grow more trees

- they produce oxygen
- they are really important and necessary for the nature

- Think Green

- Go Green

- our planet needs more green areas

- Don't cut down trees to use them

- Don't make a fire in the forest / in woods

❖ Don't cause environmental problems (air pollution, global warming etc.)

❖ Keep the environment clean

- Pick up garbage from the ground

- Don't pollute the seas, the air, the land, the soil, oceans rivers, lakes, the environment, nature, the world...

- Don't make pollution

- Don't pour waste materials in rivers, lakes, seas and oceans

- Don't throw rubbish around / on the ground

- Don't throw garbage on the streets

- Don't throw litter on the streets

- Don't drop litter

- Don't damage the environment with our trash

❖ Use recycling bins

❖ Have recycling bins at homes and at schools

❖ Classify = Separate = Sort Out

❖ Classify rubbish as paper, glass, plastic and metal

❖ Separate your garbage / your trash by type

❖ Sort out the rubbish

❖ Put the glass, paper, metals and plastic in different bags

❖ Take the trash to the recycling bins

❖ Prevent environmental problems

❖ Do a lot of things to save the environment

❖ Help protect the environment

❖ Join hands

❖ Join campaigns

❖ Prepare a poster about saving the environment

❖ Respect our world

LET'S REVISE THE WORDS

Save the earth

Save = Protect

Harm = Damage

Give Harm = Give Damage

Litter = Trash = Rubbish = Garbage / Waste

Throw = Drop

Classify = Separate = Sort Out

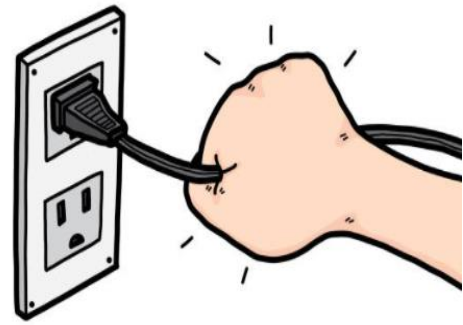

Save X Waste

Turn on X Turn off

Plug X Unplug

Clean X Pollute

Necessary

Unnecessary

1) What are the 3Rs Rules?

- They are Reduce, Reuse and Recycle.

2) Do you recycle? Why? / Why not?

- Yes, I do.
- No, I don't.
- Yes, I recycle my old books.
- Yes, I recycle glass bottles.
- No, I don't recycle waste materials. I put them in waste bins.
- Yes, I recycle because recycling helps protect the environment
- Yes, I recycle because recycling saves energy and money.
- Yes, I recycle because recycling is really important and necessary for the environment.
- No, I don't recycle because there aren't any recycling bins in our neighborhood.

3) What materials can you recycle?

- I can recycle glass bottles.
- I can recycle old batteries and newspapers.
- I can recycle plastic bottles.
- I can recycle plastic bags.
- I can recycle metals and paper.
- I can recycle light bulbs.

4) Do you plant trees? Why

- Yes, I do.
- No, I don't.
- Yes, I plant trees. Because when I plant a tree, I feel great.
- Yes, I plant trees because they produce oxygen.
- Yes, I plant trees because our world needs more green areas.
- Yes, I plant trees because they are really important and necessary for our world.
- No, I don't plant trees because we don't have so much areas to plant trees in İstanbul.

5) What can you do to protect the environment?

- I can plant trees.
- I can separate my rubbish by type and take my rubbish to recycling bins.
- I can sort out the rubbish.
- I can pick up garbage from the ground.
- I can save water and save energy.
- I can use recycling bins.
- I can turn off the taps when I don't use them.
- I can unplug the electronic devices when I don't use them

6) There are so many ways to protect the environment. What do you do to protect the environment in your daily life?

- I use less water and I don't leave the taps on when I brush my teeth.
- I turn off lights when I leave the room. In this way, we spend less money on energy.
- I plant trees and flowers and when I pick up garbage from the ground, I feel happy.
- I don't throw garbage on the streets.
- I separate my rubbish by type.
- I plug electrical devices just before I use them.
- When I go outside, I get on busses instead of cars.
- I use energy-saving bulbs.

7) What should we do to save our world? (What do you suggest?)

- We **should** use recycling bins and help protect the environment.
- We **shouldn't** waste water.
- We **should** take our trash to recycling bins and we **shouldn't** drop litter on the streets.
- We **should** grow more trees but we **shouldn't** cut down trees to use them.
- We **shouldn't** throw garbage in forests.
- We **should** use recycling bins and we **shouldn't** drive private cars.

- We **should** sort out the rubbish but we **shouldn't** throw rubbish around.
- We **should** save water.
- We **should** unplug the electronical devices when we don't use them and we **shouldn't** hunt the animals.
- We **should** think green and go green. And one more thing, we **should** respect our world.
- We **should** classify rubbish as paper, glass, plastic and metal but we **shouldn't** pour waste materials into the rivers.
- We **shouldn't** cut down trees because they produce oxygen and our world needs more green areas.

increase X reduce
