a. Satellite

b. Hot

c. Gravity

d. Cold

e. Mars

1) That is the "red planet". Scientists and astronauts call it like that because of its red surface and rocks. It is the most similar planet to Earth. Maybe, we may live on it in the near future.

2) A technologic device sent into space to let us communicate with each other.

3) Uranus's temperature is approximately -224°C . It is not suitable for a human being to live on. It is freezing. If we step on it, our body and blood system will get frozen and we'll die.

4) A force that keeps us and other things on the ground. If it disappears, everything will fly.

5) Venus's temperature is approximately 465°C . It is not suitable for a human being to live on. If we step on it, our body will burn because of extreme heat.

3. Choose the correct bold words. (4 points each.)

1- In my opinion, we will have **black holes** / **space trips** in the near future. We will get on a space shuttle, visit the Moon or other planets, take photos and watch stars on our holidays.

2- Jupiter is the fifth planet far from the Sun, and the **largest** / **smallest** in the solar system. I mean Jupiter is bigger than the other planets in the solar system.

3- **Sun** / **Meteor shower** is the source of light and heat. The Earth gets warm and bright thanks to it. Earth and other planets orbit around it.

4- Neil Armstrong and Buzz Aldrin were the first people to **end** / **step on** Moon. They searched the surface of Moon and tried to discover life forms.

5- **Water** / **Rock** is the most important thing for living beings. If we can find it on other planets, we can start a life there. If we can't find it, there will be nothing to drink. That means "no" life!

4. Match the questions with the correct answers. (3 points each.)

1. Who discovered the "gravity"?

2. When is the best time to observe the comets?

3. Can I spend time in international space station as a tourist?

4. Oh my God! Look at the sky! There is a fire ball coming towards us. What is it?
